

Job Title: Principal Guidewire Software Architect

Wage range: \$184,621 - \$216,736 USD

Position Type: Full time

Location: This position will report to the Norima Consulting US office located in San Diego, California

Duties and position description:

- Technical delivery leadership of a portfolio of Guidewire engagements. Responsible for the technical oversight of Guidewire implementation delivery efforts, ensuring client satisfaction, helping meet practice financial goals, and ensuring continued practice development.
- Expected to take responsibility for the "performance contract" of Norima's Guidewire field technical implementation resources - setting expectations and challenges, providing support and feedback, and ensuring appropriate practice knowledge dissemination.
- Act as a senior Norima contact in the line of project escalation for any Guidewire delivery related project issues and have discretion on how to solve them in concert with practice leadership.
- As part of the Insurance Transformation Practice Senior Management Team, work together to support the practice SVP in shaping the practice's operation and its relationship with Manila SDC employees and North American clients.
- Support practice business development initiatives by helping devise project plans and implementation approaches, preparing written proposals and supporting in-person pitches.
- Other duties as assigned.

Required Qualifications:

- Must have a Master of Metallurgical Engineering or Computer Science or Software Engineering or Information Technology.
- Must have Guidewire License/Certification.
- Must have at least 15 years of experience working in the field.

About Norima Consulting: For over 15 years, Norima Consulting Inc. has been helping clients grow, optimize, and transform their businesses. With offices in Winnipeg, San Diego, and Manila, we offer technology consulting to organizations in Canada and the United States in the Banking and Wealth Management and Insurance verticals.

Our consultants have extensive experience working in the same industries we service and can help you facilitate faster and more efficient business processes to improve your company's bottom line, enhance your competitive advantage and enable you to engage, understand, manage, and serve your customers and clients more effectively.

We are passionate about working with organizations leveraging technology to innovate and enable the next stage of growth.
